

# Assignment 6

You must watch the following tutorials: <https://processing.org/tutorials/> and follow the steps explained in this link to setup your project:

[https://raw.githubusercontent.com/teseoch/Intro-To-Computer-Science/master/material/getting\\_started\\_processing.pdf](https://raw.githubusercontent.com/teseoch/Intro-To-Computer-Science/master/material/getting_started_processing.pdf)

## Exercise 1

Create a Processing class that displays your NetId in red in the middle of the screen. You should provide the source code and a screenshot of the results.

## Instructions

The solution of the exercises must be provided as a **java** and **png** (for the screenshot) files. The **files must be zipped** together before upload.

**Assignments not respecting these instructions will be ignored.**
